

# JuniFunds International

## Global Wire Interface

*JuniFunds International* simplifies moving money around the world as an intuitive and powerful solution. This tool virtually eliminates the need to manage multiple logins and systems to originate global transactions. Juniper has interfaced with trusted, top-tier 3rd party global exchange providers to bring you a variety of exchange service options in a user friendly platform. Furthermore, API driven core integration options simplifies balance checks while enabling efficient daily operations.

## Integrated Wire Creation & Transmission

*JuniFunds International* streamlines the payment process by combining currency exchange rates, origination, and secure file transmission into one application. Once a rate is confirmed, our intuitive, origination wizard guides you through each step of the creation process. Each transfer is easily and securely submitted for processing with the click of a button.

## Total Control and Robust Reporting

- Integrated disclosures
- Built-in OFAC screening
- Create full audit, transaction and activity reports on the fly
- Complete administration & disbursement oversight
- Core Integration options

316.267.3200 option 2
