

JuniFunds

JuniFunds, the hosted real-time wire transfer solution from Juniper Payments, is the convergence of system integration and intuitive user experience. From template creation to processing, JuniFunds delivers a simplified and flexible application designed to create operational efficiencies for your financial institution. Seamlessly connecting via APIs, JuniFunds automates balance checks on outgoing wires and posting of inbound wires directly to the core. Domestic Wire payments are sent and received in real-time via Juniper Payments' FedLine Direct® connection. Our platform reduces dependencies on internal resources and gets your solution to market quickly making deployment a snap. JuniFunds enables you to accelerate processing by utilizing the original faster payment: a Domestic Wire.
